“Brenda did a terrific job making the Cottages look like the luxurious, high-end product we are trying to sell. She completed this work in a timely fashion and well under budget.”

Scott Kwiecinski, Development Manager – Horizon DBM

I remember when I had trouble getting a building rented and I took a long hard look at it and decided it needed a "decorator's touch". I don't remember how we met, Brenda, but I gave you the job and after working your magic the building rented right up.. After that job I decided to use your "touch" on several more buildings and in each case, I believe, it helped us tremendously in getting the buildings rented. Most architects and developers will spend millions on the "tux" but they forget to "tuck in the shirt and comb their hair" and wonder why nobody wants to dance with them at the ball! Your design assistance was the "tucked in shirt and combed hair" that my buildings needed to get their "dance partners"! It might be a silly metaphor - but it works for me.
